THE STORY OF

Once it was oil, deep in the ground,
Pulled up and melted, spun all around.
Shaped into bottles, bags, and toys,
Bright, cheap treasures for girls and boys.

We used it once, then threw it away,
But “away” is a place where creatures stay.
It drifts through rivers, it chokes the sea,
It circles back to you and me.

Recycling sounds like a magic cure,
But only a fraction makes it pure.
The rest is burned or buried deep,
A legacy we promised to keep.

The truth is clear, it's time to act,
To cut, reuse, and face the fact:
A cleaner world is ours to choose,
Less plastic made, less earth to lose.

THE VALUE OF TIME

Time is one of the most valuable resources we possess. Unlike money or material things, once time is gone it can be never regained. Each second, minute and hour that passes are a chance to do something meaningful.

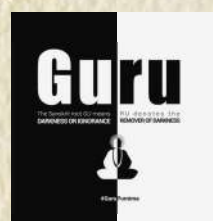

People who values time tend to lead more productive and fulfilling lives. They plan their days, set their goals and make the most of every opportunity. On the other hand, wasting time often leads to regret missed chances.

Understanding the value of time teaches us discipline, respect. Not just for our own schedule, but also for others, being punctual meeting deadlines are marks of responsibility.

Time is a silent teacher if we respect it rewards us.
